

Aboukra Energetics & Dimensional Therapy

White Paper 2012

Dimensional Therapy

The Aboukra is an ancient shamanic healing art once practiced widely across Ancient Egypt. The Aboukra was a trusted and profound healing tool used during surgery and in ancient healing temples. The Aboukra was used to heal and cure all manner of illnesses, life dramas and trauma. Not excluding medicine, Aboukra was considered a partner in the healing process and highly regarded. Disappearing with the ancient civilization only to reappear some 11 years ago through a channelled message received by Marcus Bird.

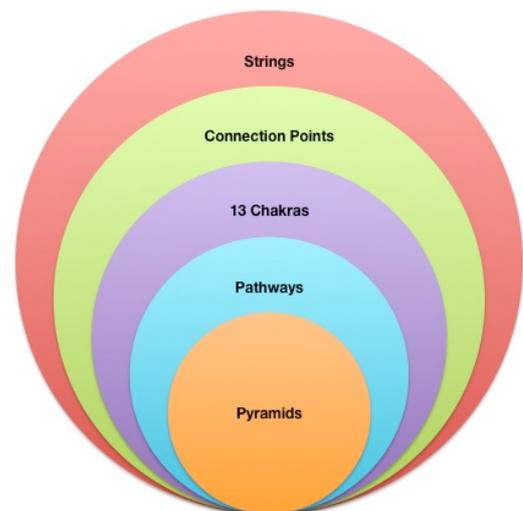

Holographic Universal Matrix

To understand the Aboukra energy and the Dimensional Therapy process one must first understand the Holographic Universal Matrix (HUM). The HUM is the hidden unseen binding force that makes up the universe that we experience and don't experience. It is the great unknown known that pervades in and through all things that we see in our dimension yet it transcends all dimensions and becomes the binding force that holds it all together. It is the alpha and omega, it is the keeper and the kept. This binding force, known as the Super String theory to Quantum Physicist, can be seen as a lattice network of string like fibers that reach out and touch everything in the universe. These strings intersect every dimension and as such connect everything to everything in this and every dimension. It is difficult for the human brain to truly understand the enormity of the HUM or even fathom the possibility that this fabric, lattice network holds the whole universe together. It is easier for us to see this HUM as a lattice network of strings heading out in all directions connecting everything we see to everything.

Nano Subtle Energetic Template

The Aboukra and Dimensional Therapy work with the nano subtle energetic template of the body. This nano subtle energetic template, until now, has been used subconsciously through various energetic modalities. The Aboukra awakens our inherent knowledge and understanding of this template so that we can consciously connect to it's healing power. The nano subtle energetic template is made up of:

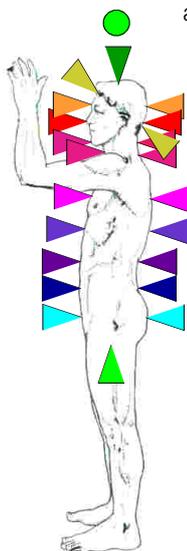

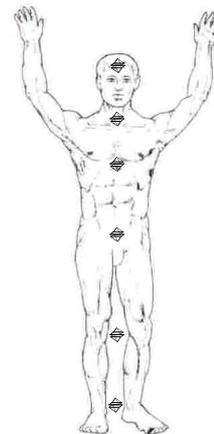

1. Pyramids - 12 end on end forming six octahedrons.
2. Pathways - Internal representations of the strings.
3. Chakras - 13 chakras.
4. Connection Points - 13 connection points.
5. Strings - exit and enter the body and become the fabric of the universe.

Each part of the template builds on the other housed within the boundaries of sacred geometry, spinning and oscillating with the vibration and resonance of the universe.

Connecting with The Aboukra

The pyramids held deep within us in six key locations in the body are made up of twelve individual pyramids forming six octahedrons at the feet, knees, Tan Tien, heart, throat and head. These pyramids spin in opposite directions and provide us with stability to function as humans in this dimension. The faster these pyramids spin the greater stability just like a spinning top. These pyramids also hold a gravitational force within them and assist us in attracting abundance into our lives. They assist us in all aspects of our life from health and wellbeing to serendipity and fate.

These pyramids are fed by both the strings/pathways which, connect us to everything, and the thirteen chakras. It is the strings and pathways that provide the shape and stability of the pyramids intersecting each of the walls, points and centre line of the octahedrons. A pyramid in the correct shape has the ability to spin faster than one that is crooked. Each of the strings vibrate with certain parts of the body and can be used to identify interference in the vibration of each of the organs of the body.

In turn the chakras provide the pyramids with the energy to spin, transducing universal energy into human potential energy and hence give it the ability to spin. In the Aboukra system we utilize the thirteen chakras which represent a full harmonic. Similar to the keys on a piano there are twelve keys in each octave the thirteenth representing the start of the next octave. As with the piano it is difficult to play a beautiful piece of music using only the seven white keys leaving out the five black keys. When we use both white and black keys a beautiful sound can be produced and a full musical score maybe performed. It is the same with us and only using seven of the white keys, a complete healing can not truly be accomplished using only some of these keys.

The connection points are the interface and intersection points for the strings as they enter and exit the body. As they enter the body they become pathways. These pathways spiral around the body and into each of the pyramids giving them shape to spin. The pathways can be affected and effect the organs in the body and can assist us in understanding the vibratory health of our physical systems. These intersection or connection points allow us to work with the strings as they head out into the universe. These strings keep us connected to our past and future as well as our dimensional, parallel and other lives. We can use these strings to sense de-stabilization's in any of these lives and understand how they may or may not be effecting us in this life now.

Using the Aboukra energy we can stabilize and bring our physical, mental, emotional and dimensional selves back into alignment allowing us to vibrate at our own true frequency. Through the initiation and atonement to the Aboukra frequency students are guided to connect to the sensory and intuitive intelligence side of our being where profound identification and healing can occur. Then through the application of hands on healing techniques, use of essences, sound healing and Dimensional Therapy techniques, clients are stabilized back to their own individual frequency allowing the body to heal itself.

We run Aboukra information evenings and practitioner workshops in Dimensional Therapy throughout the year. Please check out our web site for times and costs at www.aboukraenergetics.com and help us spread the word. It is time for this energy to expand across the planet and assist us all in raising of our individual and collective frequency and energy.
